MODERN WEB-BASED ASSESSMENT

ExamFlow

A clean, secure, and zero-setup platform for creating, conducting, and grading digital examinations.

What is Wrong with Traditional Exams?

Heavy Paperwork

Hours spent printing scripts, stapling packets, and distributing them physically.

Difficult Invigilation

Manual policing with zero automated monitoring for tab switches or copying.

Slow Grading

Days lost manually reviewing papers, vulnerable to fatigue and scoring errors.

The ExamFlow Advantage

0s

Setup time with instant browser links

- Create an exam once and share a single URL
- Students join instantly without creating accounts
- Fully automated grading for instant results

Core Assessment Features

MCQ Auto-Grading

Instant scoring for multiple-choice questions right upon submission.

Written & Photo Input

Long-form text responses combined with direct camera/photo document uploads.

CSV Data Import

Bulk upload question banks and export final student performance effortlessly.

Built-In Security & Anti-Cheat

Live Activity Grid

Educators monitor student status, active timers, and submissions in real-time.

Tab Switch Flags

Automatically detects and logs when students switch browser tabs or lose focus.

Clipboard Lock

Copy and paste functions are disabled throughout the duration of the test.

Benefits for Educators & Students

For Educators

- Save 4+ hours of grading weekly
- Simple exam creation dashboard
- Clean CSV grade exports

For Students

- Zero account creation required
- Works on any modern browser
- Stress-free automatic progress saving

Technical Architecture

Browser Runtime

100% web-based client supporting Chrome, Safari, Edge, and Firefox seamlessly.

Real-Time Sync

Firebase backend instantly syncing student answers, states, and audit logs.

Cloud Hosting

Lightning-fast global deployments hosted reliably on Vercel infrastructure.

Ready to transform your exams?

Build and launch your first digital exam in seconds with ExamFlow.
